

Classwork 4-24-2020

Happy Friday!

You are required to take a Quizlet “learn” quiz and send me the answers. I am also including some “I am bored” stuff that you might like to try!

Good morning and Hello from Mrs. Cronin!
Today is 4/24/2020

Where To Find Your Work: <https://lynncronin.weebly.com/>

Learning Objectives: today you will prove that you learned your multiplication tables for the week. Then you will get your well-earned Free Time!

But I have also added a goofy section about what I have been doing over this closed period. I think you will like it!

Learning Activities: PowerPoint Quizlet Quiz

How We Communicate: lcronin@wtps.org / 856-857-7707

MA.3.OA.C, MA.3.OA.C.7 - MA.4.OA.A - MA.5.NBT.A

**There are a couple of pages of “stuff”
in this file, please read them!**

Use this link to go to the Learn section of Quizlet. When you finish the quiz take a screenshot and send it to me.

This counts as your multiplication quiz grade for the week.

(screenshot directions next, but you could take a picture with your phone)

Once you have
logged in it will
remember you.

How to take a screenshot

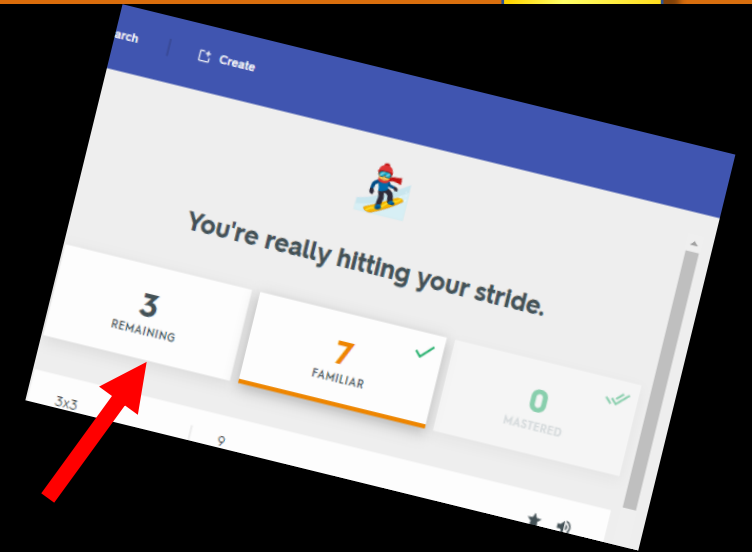

A screen capture is a picture of your computer screen.

You can screenshot any screen on your computer. I am asking for Quizlet.

The last screen on Quizlet “Learn” will give you a score (like this picture)

On your computer keyboard:
touch Ctrl and Prt Sc (or Fn and Prt Sc)

Then go to your email and paste the picture into the email and send it to me.

This is where the Ctrl/Fn and Prt Sc keys are.

You might have to play with it a little – but now that you know its there you should be able to find it.

Some of you need to work on

First-In-Math!

We are all being graded for that work – even me!

Please, Please, Please do some First-In-Math
if you have not been doing it well!

And now for the fun stuff!

**I don't know about you, but I have
been bored out of my mind!**

So I thought I would show you what I've been doing!

You are NOT required to do this – but it might be fun!

When I was making dinner last week,
I decided to try to grow some veggies!

I hate making dinner every night!
And the dishes! Where do all the dishes come from?

I am trying to grow vegetables from scraps. That means that I am not using the food part of the vegetables, I am using the stuff that you would throw away.

**Do not do this
without permission
from your parents!**

Anyway.

**I am lousy at growing anything!
But I am bored out of my mind so...**

**My mother used to grow carrots
from the top of a carrot.
She would stick it in water and
suddenly it would grow roots and
then it would grow pretty leaves.**

**That pretty houseplant is actually a carrot!
It will not grow new carrot though! Bummer.**

Pretty cool huh?

And by the way, that is a picture that I found online. I am hoping that one day I too will have a carrot houseplant.

So I didn't have carrots, but I did have some green onions.

And just for fun I stuck the bottom of one into some water.

And look! It grew roots and some more green shoots.
(look at all those roots!)

I cut some off the other day to add to my dinner.

It was delicious!

Green Onions!

These are on my windowsill.

Then I decided to try some other plants.

This is a whole onion. It's been in the water for about 4 days and its already growing roots!

Did you notice that I stuck toothpicks into the sides of it so that just the root area is touching the water?

Soon it will begin growing leaves out of the top.

I can't wait!

Next to my plants is a pepper.

Inside of the pepper are seeds.

Supposedly you dry the seeds and then plant them in soil and they will grow.

I will take the rest of the seeds out of the pepper and let them dry.

I don't actually expect it to work, but its worth a try!

This is a better picture of the seeds in a pepper.

Any type of pepper will work!

There are an amazing number of types of pepper!

I wonder if a chocolate pepper is sweet?

Habanero Peppers

Carolina Reaper

Scotch Bonnet

Chocolate pepper

White Bell Pepper

Jalapeño Pepper

Christmas Bell Pepper

I looked around on the internet and a surprising number of food scraps can be used to grow a new plant.

Many of them are just like the onions – cut off the top and plop them into some water.

Peppers require more work. This picture shows lettuce, green onions, beets, sweet potatoes, regular potatoes and red onions.

Fast Growing Plants

https://www.youtube.com/watch?v=az_yNVEM7CY

The easy way to grow tomatoes

https://www.google.com/search?q=how+to+grow+cherry+tomatoes+from+scraps&rlz=1C1GCEB_enUS839US839&oq=how+to+grow+cherry+tomatoes+from+scraps&aqs=chrome..69i57j0l4.7128j0j4&sourceid=chrome&ie=UTF-8#kpvalbx=HmOgXs7RJ-2wytMP66aN2AQ85

By the way, I have not tried these, but it's worth a shot – right!

Other plants that grow just like a carrot:

- Potatoes
- Lettuce
- Beets
- Leeks
- Bok Choy
- Celery
- Basil
- Sage
- Thyme
- Spinach
- Lemon Balm

Other plants that might be fun:

Garlic will grow if you put a single clove into soil (root side down. When the leaves turn yellow it is ready to harvest – and use for cooking! It will grow in a pot or in the garden)

Pineapples Twist the leaves off the top of the pineapple then strip away enough leaves that you have a stem to put into the water. Place into a glass of water for about 3 weeks. When it has roots it's ready to plant into a pot of soil. Water it to keep it damp and warm. After 2 weeks it should grow new leaves – and supposedly it will grow a new pineapple in about 18 months.

I would watch this video:

<https://www.youtube.com/watch?v=MHFvC5Rm5Pw>

What are you doing for fun?

Are you building crazy machines?

Are you making crafts?

Drawing pictures?

Send me a picture and a description and I will be happy to show all of my students your cool stuff.

Who knows, maybe your craft will become the cool thing to do around Wedgwood School!

Don't sit around being bored – do something!

**Next week I will show you
how my plants are growing,
and I will also send you
another idea!**

Remember: this is NOT an assignment – it's just for fun!
