Classwork 4-8-20

Place Value

Today we will learn more about place value so that we can read large numbers! It's kina cool!

Good morning and hello Third Graders from Mrs. Cronin!
Today is Wednesday 4/8/2020

Where To Find Your Work: https://lynncronin.weebly.com/ 4-8 G3 PValue2

Learning Objectives: Today we will begin to explore place value. By the end you should be able to read the name of large numbers out loud.

Learning Activities: PowerPoint, Quizlet, First-In-Math

How I will see/check your work: Email **lcronin@wtps.org** or phone/text: 856-857-7707

How We Communicate: Email **lcronin@wtps.org** or phone/text: 856-857-7707

MA.3.NBT.A , MA.3.NBT.A.2 , MA.3.OA.D.9 , MA.3.NBT.A.2, MA.3.OA.B.5

Don't forget
Spring Break is next week.

We won't have school on Friday or next week.

Two more days – today and Thursday then we won't see each other until April 20th.

If you need anything at all, call me!

856-857-7707

We started by learning how to name some simple numbers.

Let's practice that skill first.

Then we will learn more!

Back to work!

What is this number?

Billions	Millions	Thousands	Ones
___	986	000	000

___,986,000,000.

Nine hundred eighty-six million

Billions	Millions	Thousands	Ones
___ ,	986 ,	000 ,	000 .

What is this number?

One hundred forty-three thousand

What number is this?

Billions	Millions	Thousands	Ones
____,	483,	000,	000.

Four hundred eighty-three million

Billions	Millions	Thousands	Ones
___ ,	483 ,	000 ,	000 .

What number is this?

It looks different but it works the same way, name the number that is in the largest group then the group name

Sixty-five thousand

What number is this?

Billions	Millions	Thousands	Ones
12	000	000	000

Twelve billion

Billions	Millions	Thousands	Ones
12	000	000	000

What number is this?

Billions	Millions	Thousands	Ones
	6	000	000

Six million

What number is this?

Billions	Millions	Thousands	Ones
___	453	765	000

Oh No! We did not learn this yet!

Do it the same way, just twice.

Largest group: four hundred fifty-three million

Second group: seven hundred sixty-five thousand

Billions	Millions	Thousands	Ones
___ ,	453 ,	765 ,	000 .

Now put it together

This number is…

four hundred fifty-three million seven hundred sixty-five thousand

Billions	Millions	Thousands	Ones
___ ,	453 ,	765 ,	000 .

So… say first group, then group name then second group – with its group name and so on and so on …

This number is…

One hundred thirty-four billion, nine hundred sixty-eight million

Try this

What number is this?

Billions	Millions	Thousands	Ones
767,	823,	000,	000.

Try this

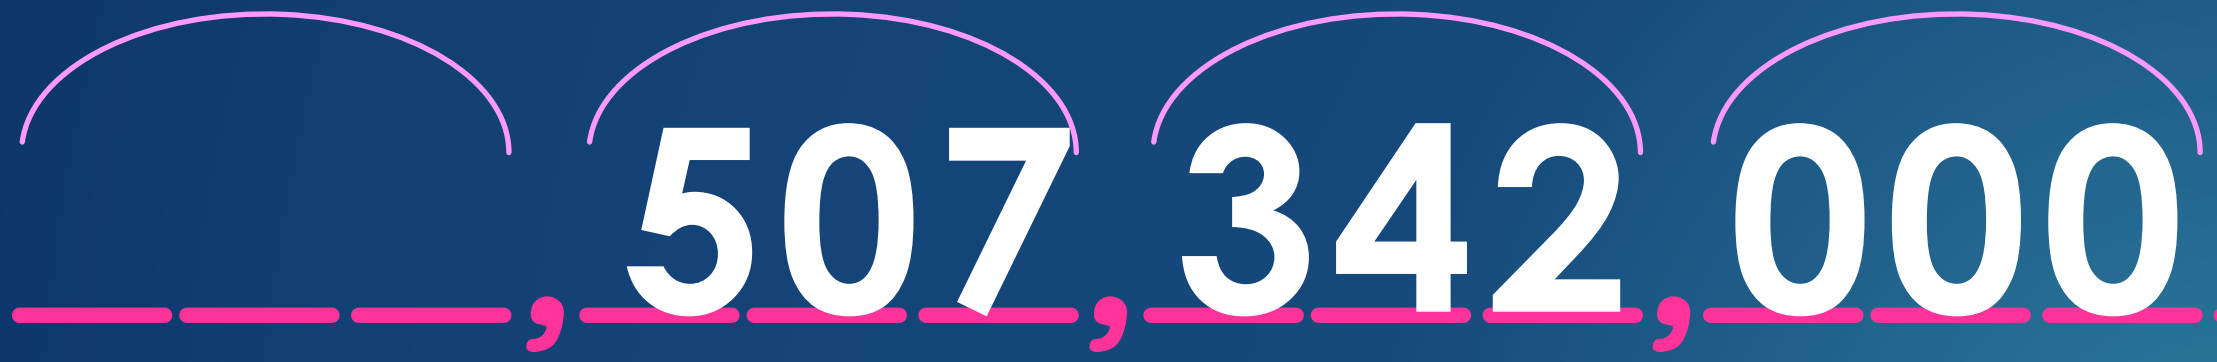
Seven hundred sixty-seven billion, eight hundred twenty-three million

Billions	Millions	Thousands	Ones
767,	823,	000,	000.

What number is this

Billions	Millions	Thousands	Ones
	507	342	000

Five hundred seven million, three hundred forty-two thousand.



What number is this?

Billions	Millions	Thousands	Ones
		539	324

Five hundred thirty-nine thousand three hundred twenty-four

Don't forget – you do not name the ones group name!

Five hundred thirty-nine thousand three hundred twenty-four

One more thing.

Did you notice that we never, ever say the word AND?

That word will only be used if the number also has decimals.

Enough!

Practice your multiplication on Quizlet at:

https://quizlet.com/500587447/multiplication-46-flash-cards/?x=1qqt

Then spend 10 minutes on First-In-Math

(and by the way… for those of you who have been skipping First-In-Math)

I can see you!
